ABOUT ME

Systems Engineering student at Universidad Distrital Francisco José de Caldas with more than two years of completed undergraduate studies, motivated to begin and develop my professional career.

I have knowledge in programming and information processing using Python, Java, and C++, as well as data analysis and management through PostgreSQL, MariaDB, and MongoDB databases. I have participated in academic projects focused on analytical solutions, process automation, and structured information management. I am characterized by strong analytical skills, teamwork, organization, and a proactive learning attitude, allowing me to adapt effectively to organizational processes, sub-processes, and established guidelines.

ACADEMIC PROJECTS

Microenterprise Density Prediction System (GoDaddy Dataset)

2025

Python - Data Analysis - Machine Learning

Academic

- Analyzed and processed real-world data from the GoDaddy Kaggle dataset.
- Implemented analytical models in Python to support data-driven decision-making.
- Performed data preprocessing and validation of results.

Hotel Database Management System

2025

PostgreSQL - SQL - Relational Model

Academic

- Designed and structured a relational database system.
- Defined tables, primary and foreign keys, and applied data normalization.
- Implemented business rules through queries, functions, and triggers.

Music Management System

2024 - 2025

C++ - Data Structures - AVL Trees

Academic

- Developed a CRUD system for managing albums, songs, and artists.
- Optimized data access using efficient data structures.
- Implemented data persistence using text files.

EDUCATION

Universidad Distrital Francisco José de Caldas

In Progress

B.Sc. in Systems Engineering

Bogotá, Colombia

SENA

2025

Course: Software Quality Application in the Development Process

TECHNICAL SKILLS

Backend Programming: Python, Java, C++

Frontend Programming: JavaScript, PHP, Python

Databases: PostgreSQL, MariaDB, MongoDB

Data Analysis and Information Management

Tools: Git, GitHub, Docker

Methodologies: Scrum, PSP, TSP, Crystal
